

DOG RABIES VACCINATION AND LICENSE

Any person who owns, keeps or harbors a dog, 5 months or older, within the city limits of Wichita, for more than 10 days, is required to have a licensed veterinarian vaccinate the dog for rabies. At the time of vaccination, the licensed veterinarian will issue a City of Wichita permit application. The permits are good for one year from the date of the rabies vaccination and must be renewed yearly. If a person owns, keeps, or harbors a dog that is retired from the U.S. Armed Forces, is a registered seeing eye dog, or a Police Department/Sheriff/Fire Department dog, a fee will not be required but a license is still required.

The City of Wichita **does not** honor two or three year vaccinations, which are sometimes given by veterinarians outside of the city.

The fees are as follows: If the dog is -

fenced and spayed/neutered	\$12.00
fenced and not spayed/neutered	\$17.00
unfenced and spayed/neutered	\$22.00
unfenced and not spayed or neutered	\$27.00
